

PIX-Gallant[®]

High Power Belts to rival Gates - "Predator" & Optibelt - "Blue"

Features & Benefits

- 40 to 55% higher power transmission
- Excellent durability & strength
- Reduced number of belts required
- Excellent abrasion and wear resistant

NB. Finer Power Transmissions is stocking all Gallant belts listed above in Australia. Banded Gallant belts and other single Gallant belt lengths (not listed) can be quoted and ordered on request.

PIX-Gallant Belts

PIX Gallant is a latest evolution in Power Transmission Technology with the help of Dry Cover belts.

For ultimate performance in every toughest applications of agriculture, forestry, mining, construction & manufacturing, PIX Gallant is the right choice. PIX Gallant is exclusively designed to offer unique solution for highly demanding requirements like - Extra heavy duty applications.

- Drives with space constraint
- Drives where high power transmission is required
- Applications comprising of high shock loads which is caused due to sudden start / stop of the machine
- Drives with high ambient temperature conditions
- Drives with harsh working conditions

Construction

- Top tie band offers lateral rigidity, that prevents belt from shocks & offer smooth running in multi-groove pulley.
- Especially treated aramid tensile member to provide extra strength & no belt stretch.
- Especially compounded CR rubber base compound provides excellent resistance to oil & heat.
- Non- rubberized outer cover maintains required slippage and prevents belt from abrasion.

Operating Temperature

-25° to +120° C

Features

High power transmission capacity

- Up to 40% for PIX Gallant single belts
- Up to 55% for PIX Gallant banded belts
- Specially treated outer tough cover reduces sidewall wear and withstand sudden shear forces at peak loads.
- Belt is designed to exhibit excellent durability, strength, abrasion & wear resistant.
- Unique performance under heavy shocks & impulse loads.
- Low heat generation even at very high speed.
- Best solution for compact drives as lesser no. of belts are required.
- “Fit it Once”. No re-tensioning required.
- One single branding that combines all the major features & fit for every robust application.

Product Range

Wedge & narrow belt sections both in single & banded belts

NB. Finer Power Transmissions is stocking single Gallant belts in Australia. Banded Gallant belts will need to be on special order.

Other Products

- Industrial Belts
- Automotive Belts
- Agricultural Belts
- Horticultural Belts
- Special Application Belts
- Taper Lock Pulleys & Bush
