High Strength

THREADLOCKERS

Locana 253	263™ General Purpose
Ó	Disassembly: Removable with standard hand tools, where hand tools do not work, apply localised heat.
	Form: Liquid
+	Temperature Resistance: 180°C

Viscosity : 500 cP Breakloose Torque*: 39 N.m Fixture Speed: 10 minutes Full Cure: 24 hours

Disassembly: Removable with standard hand tools, where hand tools do not work, apply localised heat.

Form: Semi-solid wax

Temperature Resistance:

Viscosity: Semi-solid wax Breakloose Torque*: 40 N.m Fixture Speed: 5 minutes Full Cure: 24 hours

Form: Liquid

Temperature Resistance: 150°C

Viscosity: 7,000 cP Breakloose Torque*: 38 N.m Fixture Speed: 45 minutes Full Cure: 24 hours

Form: Liquid

Temperature Resistance: 232°C

Viscosity: 6,000 cP Breakloose Torque*: 23 N.m Fixture Speed: 45 minutes Full Cure: 24 hours

How to choose a threadlocker.

From heavy equipment and permanent assemblies to mounting bolts and adjustment screws, LOCTITE® has your Threadlocker.

LOW STRENGTH

Primarily used on adjustment screws, calibration screws, meters and gauges. They have high disassembly frequency and are removable with hand tools.

MEDIUM STRENGTH

Great for machine tools and presses, pumps and compressors, mounting bolts and gearboxes. They have normal disassembly frequency and are removable with hand tools.

HIGH STRENGTH

Used for more permanent assemblies, heavy equipment, suspension bolts, motor and pump mounts, cap bolts and studs. These are rarely disassembled and require localised heat for effective removal.

Threadlockers come in a variety of different forms ranging from liquid, which flow smoothly into gaps and spaces, to semi-solid, a no-drip, no-mess formulation ideal for overhead applications. Knowing your

application will help you select the correct Threadlocker.

+ TEMPERATURE RESISTANCE

LOCTITE[®] Threadlockers are formulated to withstand extreme temperatures for continuous service from application to removal.
